

EVERYONE'S DARLING RELOADED GROHE EUROSMART KITCHEN

WELCOME TO THE HEART OF THE HOME! Nowadays, the kitchen more and more merges with the dining and living room, thereby turning into the heart of the home. It has thus become more than just a functional space to prepare food but has evolved into a design statement with the spotlight of attention on the faucet.

GROHE EUROSMART FAUCETS – FULL FLEXIBILITY, FULL COMFORT

The updated GROHE Eurosmart faucet is available in a multitude of design variants: from low to medium or high spout faucets, in U-shape or C-shape. With this product range, everyone can find their favorite GROHE Eurosmart kitchen faucet. This variety in design is also evident when it comes to the faucet's finish. Eurosmart is available in brilliant Chrome or contemporary matte SuperSteel style, both with an easy to clean and scratch-resistant surface. The faucet not only impresses with its slim, modern design but, moreover, offers great functionality: The swivel spout, for instance, allows full flexibility.

GROHE Eurosmart medium spout, in Chrome

GROHE Eurosmart high U-spout, in SuperSteel

SAFE WATER CONSUMPTION

With **GROHE Zero** there is no contact of the water with lead and nickel within the faucet thanks to isolated inner waterways that ensure extra safe water consumption.¹

INSTALLATION HAS NEVER BEEN SO EASY

Thanks to the practical **GROHE FastFixation Plus** system, the installation of GROHE Eurosmart is particularly easy and quick. Due to the tool-free and pre-assembled fitting, installation is fast and hassle-free.²

HOLISTIC KITCHEN DESIGN BY GROHE

For a complete kitchen concept, the faucet also needs to be accompanied by a matching sink. GROHE offers a variety of kitchen sinks that fit every kitchen as perfectly as the GROHE Eurosmart faucet. Both the K200 or K400 stainless steel sink with different drainer variants make perfect companions for the Eurosmart faucet. For people who prefer stylish dark colors, both sink series are also available as composite sinks in granite gray and granite black. All sinks are available in different sizes to make sure that the kitchen elements fit any individual style and preference.

EXTENDING THE MODERN HOME DESIGN TO THE BATHROOM

Versatility at its finest: For GROHE innovations are not limited to new lines. With the relaunch of the Eurosmart bathroom faucet GROHE is not only introducing a contemporary design for the fourth generation of bathroom favourite to match the Eurosmart kitchen faucet but launching completely new product variants. For further details see the GROHE Eurosmart bathroom fact sheet.

The range comprises washbasin, shower, bath and bidet solutions that match Euro Ceramic perfectly in form and function and simplify the consistent planning of a complete bathroom with a distinctive design.

Modern design combined with comfort functions and smooth installation: GROHE Eurosmart offers a reliable solution for any bathroom – rounding up the holistic design concept from kitchen to bathroom.

PUTTING A FOCUS ON HEALTH AND SAFETY

GROHE TripleCore: Thanks to its innovative zinc die casting process at the LIXIL plant in Klaeng, Thailand, one of the most sustainable plants in South East Asia, the faucet offers safe water enjoyment. Not only is the **surface of the faucet seamlessly closed** so that impurities cannot enter, there are also dedicated inner waterways to make sure that the **water does not get in contact with lead and nickel** within the faucet. Above that these inner waterways have no contact to the body material which result in a **barrier between hot water and the external surface to avoid scalding on hot surfaces**. Thus, extra safe, especially for households with children.

SUPPORTING A SUSTAINABLE LIFESTYLE

By restricting the water flow, product variants with **GROHE EcoJoy** and **LowFlow technology** support consumers with a more sustainable water consumption.

With **GROHE SilkMove ES**, product variants support the saving of energy and water. Thanks to the cold start technology, the mid-lever position only provides cold water, thereby reducing wastage of hot water and saving precious water and energy.
