GROHE installation systems have a long tradition within the portfolio – the brand looks back on 50 successful years of developing true hidden champions. With their comfortable installation, they simplify the daily work of professionals worldwide. And although GROHE's reliable sanitary systems disappear behind the wall, they enable consumers to design their dream bathroom: As the perfect match for GROHE Ceramic, Shower toilets or the brand's versatile flush plate collection.

## A HIDDEN CHAMPION

The Rapid SLX fits all rimless WCs and, with its integrated flush flow restrictor, it takes just a few seconds to set or adjust the flush - without any disassembly. But the new frame offers even more advantages: Thanks to the integrated power connection and an additional water path, a shower toilet can also be easily installed at a later date. A future-proof solution.
