RELAUNCH OF THE ALL-TIME CLASSIC GROHE EUROSMART KITCHEN

When planning a kitchen, the most important aspect is that it truly fulfills the needs of the people who use it. For the customer consultation it is thus helpful to have a wide selection. With the new GROHE Eurosmart faucet, installers and planners can meet the increasing needs of today's customers – new comfort features, contemporary design and high quality at an affordable price.

The classic faucet line is now available in **eight variants** with **three different heights**, in a **U- or C-shape** and as a **wall-mounted faucet**. Installers and planners can offer customers further choices with **two different finishes**: a brilliant **Chrome** and a matte **SuperSteel**, both with an easy to clean and scratch-resistant surface.

PULL-OUT SPOUT

- For complete comfort when filling water into pots or while cleaning
- Dual spray options allow flexible control of amount of water and water jet
- Available only for low spout variants

WELL-KNOWN GROHE FAUCET ADAPTS TO MODERN CONSUMER NEEDS

EASY INSTALLATION

Thanks to the practical **GROHE FastFixation Plus** system, the installation of the kitchen faucet is particularly easy and quick. Due to the tool-free and pre-assembled fitting, installation is done fast and hassle-free.

SAFE WATER CONSUMPTION

With **GROHE Zero**, there is no contact of the water with lead and nickel within the faucet thanks to isolated inner waterways that ensure an extra safe water consumption.¹

SUSTAINABLE WATER USE

GROHE SilkMove ES technology prevents unnecessary use of hot water by supplying cold water with the faucet lever in the middle position, thereby saving precious water and energy.²

GROHE EcoJoy is a water-saving technology. An integrated flow restrictor reduces the water flow. While regular kitchen faucets have a water flow of 9,1 l/min EcoJoy reduces the flow to 5,7 l/min, without compromising on comfort.³

¹ This feature is only integrated in specific Eurosmart product variants.

HOLISTIC KITCHEN DESIGN BY GROHE

To complete the 60 centimeters surrounding the kitchen faucet by one single design, GROHE offers the stainless steel sinks K200 and K400 and undermount solutions. For customers who prefer a stylish dark sink, both sink series are also available as composite sinks in granite gray and granite black. Custom fit according to individual customer requirements – all sinks are available in different sizes so that the kitchen elements fit any project.
