

THE FUTURE OF HYGIENE COMBINING COMFORT AND HYGIENE

PART OF LIXIL

GROHE Bau Cosmopolitan E

Hygienic hand washing without touching the faucet to cut the risk of transmission of germs. Optimized inner waterways allow for less water stagnation in the faucet.

GROHE Tectron Bau E Infrared WC Plate

WC flushing is activated automatically through the infrared electronics. The touchless technology is extremely hygienic, as no contact with the plate is required for activation.

GROHE Manual Bidet Seat

Transforms a simple toilet into a comfortable, hygienic place. Two separate spray arms offer a gentle cleansing with pure water. The spray heads are out of an antibacterial material. The retractable spray arms are protected for extra hygiene and can be rinsed before and after every use.

GROHE Sensia Arena

With the shower toilet Sensia Arena there is no need to touch the lid or the flush plate: Prompted by a sensor, the lid opens and closes automatically while the toilet flushes automatically* when you leave the lid. Another plus for hygiene: The PlasmaCluster** technology inactivates bacteria for a purified toilet.

GROHE Zedra Touch

Equipped with GROHE's EasyTouch technology, the faucet enables you to control the water flow with just one touch – great for those moments when your hands are dirty as it can be operated just by your wrist or elbow.

GROHE Eurosmart Cosmopolitan E

A precise infrared sensor minimizes the risk to spread germs through touchless use. It comes with much more intelligent features like automatic flushings and a temperature limiter cutting the risk of scalding.

GROHE Essence Ceramic

Special ions with an antibacterial effect prevent bacterial growth and ensure that the ceramic surfaces remain clean.

* WITH THE OPTIONAL AUTOMATIC FLUSH KIT
